Here's an example of a high resolution photo from this morning's flight.

It is a raw file (25MB).

The image is a bit blurry due to the foggy weather conditions at the time it was taken.

These are being processed and uploaded to the n-link file where you will be able to see this image (and others) via Google Earth. As you can imagine, it takes a lot of time to move large files like these via Satellite or a slow internet connection.
